Overview of the Release

In This Chapter

This chapter provides a brief overview of Ellucian Recruiter™ 3.8.2 and planned future enhancements. [Table 1](#) lists the topics covered in this chapter.

Table 1: Topics in This Chapter

Topic	Page
Recruiter 3.8.2 Overview	6
Documentation for This Release	7

Recruiter 3.8.2 Overview

Recruiter 3.8.2 is a small release that resolves high priority issues with the ACT, SAT, College Board Student Search Service, and Apply Texas imports.

If your institution uses Apply Texas and you have not previously installed the external website delivered with Recruiter 3.8.1, you must install the Recruiter 3.8.2 external website. Otherwise you can continue to use your currently installed external website.

In addition, Recruiter supports the latest version of ExactTarget. Ellucian strongly recommends that install version 5.0.462.128065, which delivers important bug fixes. See ExactTarget [Winter 2014 Release](#) notes for more information.

Recruiter 3.8.2 also includes the fixes that were delivered as part of Recruiter 3.8 and 3.8.1. See the *Recruiter 3.8 Release Highlights* and the *Recruiter Apply Texas* documents for more information about the changes made in each release.

Documentation for This Release

Recruiter 3.8.2 is accompanied by these Release Highlights and the information sources listed in [Table 2](#).

Note: The Recruiter 3.8.2 release resolves high priority issues which are described in this document. The rest of Recruiter documentation, including Recruiter 3.8 installation procedures, applies to Recruiter 3.8.2.

Note: Recruiter documentation is available from the [Ellucian Support Center](#), “Ellucian Recruiter” documentation library. You can access the manuals for the Recruiter 3.8.2 release in the [Recruiter 3.8.2 Documentation content pack](#).

Installation Information

In This Chapter

This chapter includes high-level information about installing and configuring updates to Recruiter.

[Table 3](#) lists the topics covered in this chapter.

Table 3: Topics in This Chapter

Topic	Page
Installation Information	10
Browser Compatibility	16

Installation Information

The following sections contain information about the Recruiter 3.8.2 installation and upgrade.

New Installations

For information about performing a new installation of Recruiter 3.8.2, see the *Recruiter 3.8 Installation Procedures* manual.

Not following all the instructions in the *Recruiter 3.8 Installation Procedures*, particularly configuration settings for the CRM application server, could result in errors during import.

Upgrades from 3.7.1, 3.8, or 3.8.1

Recruiter 3.8.2 supports upgrades from Recruiter 3.7.1, 3.8, and 3.8.1. To upgrade from any other version of Recruiter, you must first upgrade to Recruiter 3.7.1 then upgrade from Recruiter 3.7.1 to Recruiter 3.8.2.

[Table 4](#) lists the high-level procedures for upgrading to Recruiter 3.8.2. For more information and detailed steps for each procedure, see the referenced page number in the *Recruiter 3.8 Installation Procedures* manual.

Table 4: Procedures for upgrading to Recruiter 3.8.2

Where	Upgrade Task	Comments
Prepare for Recruiter 3.8.2		
All Recruiter servers	1. Delete workflow tasks.	See page 133 of the <i>Recruiter 3.8 Installation Procedures</i> manual for more information.
	2. Back up data.	<ul style="list-style-type: none"> • Recruiter database server • CRM application server • Recruiter web front-end server <p>See page 133 of the <i>Recruiter 3.8 Installation Procedures</i> manual for more information.</p>
	3. Locate and retrieve Ellucian software.	See "Recruiter Software" beginning on page 13 of this document for more information about downloading the Recruiter software.
	4. Installing ExactTarget.	See page 75 of the <i>Recruiter 3.8 Installation Procedures</i> manual for more information.
Install Recruiter software		
CRM application server	5. Preinstallation verification.	See page 101 of the <i>Recruiter 3.8 Installation Procedures</i> manual for more information.
	6. Installing Recruiter CRM components.	<p>See page 102 of the <i>Recruiter 3.8 Installation Procedures</i> manual for more information.</p> <p>ALERT! If you are upgrading Recruiter, we recommend that you reboot the CRM application server both before and after the upgrade. Rebooting before the upgrade clears all current activity on the server so that the installer, which is a resource-intensive process, can perform optimally. Rebooting after the upgrade clears the server memory after the Recruiter solution has been imported and optimizes system performance. Additionally, after rebooting before the upgrade, you should restart the Microsoft Dynamics CRM Asynchronous Processing Service.</p>
Recruiter web front-end server	7. Installing Recruiter external website components.	<p>See page 114 of the <i>Recruiter 3.8 Installation Procedures</i> manual for more information.</p> <p>Note: If your institution uses Apply Texas and you have not previously installed the external website delivered with Recruiter 3.8.1, you must install the Recruiter 3.8.2 external website. Otherwise you can continue to use your currently installed external website.</p>

Table 4: Procedures for upgrading to Recruiter 3.8.2 (cont'd)

Where	Upgrade Task	Comments
Perform post-installation upgrade procedures		
Location varies	8. Review and complete the Recruiter installation.	See page 151 of the <i>Recruiter 3.8 Installation Procedures</i> manual for more information. Review and perform the miscellaneous post-installation steps. Not all of the procedures are required for Recruiter 3.8.2 and may have been performed during a previous Recruiter installation.
	9. Review and specify configuration settings.	See page 213 of the <i>Recruiter 3.8 Installation Procedures</i> manual for more information. Review and specify configuration settings. No new configuration settings were delivered with Recruiter 3.8.2, but the procedures are included in case you did not configure the settings during a previous Recruiter installation.
CRM application server	10. Review subtest configuration settings.	See "Subtest Configuration Settings" on page 20 for more information. Note: The subtest configuration settings were originally delivered as part of Recruiter 3.8.1.
	11. Correct SAT subject tests	See "Correct SAT Subject Tests" beginning on page 21 for more information.
	12. Correct ACT subtests.	See "Correct ACT Subtests" beginning on page 24 for more information.
	13. Update import mappings.	See "Update Import Mappings" on page 28 for more information.
	14. Run the Recruiter Post Install Utility	See page 136 of the <i>Recruiter 3.8 Installation Procedures</i> manual for more information.

Recruiter Software

The following sections list the locations of the Recruiter software.

Note: Recruiter 3.8.2 has no changes to the Recruiter integrations with Colleague, Banner, or PowerCampus.

Colleague Clients

The Recruiter 3.8.2 software is available from SA Valet. See the *Updating Colleague Software* manual for detailed procedures for retrieving the SA Valet software components and installing the software updates. [Table 5](#) lists the software required if you are performing a new installation of Recruiter 3.8.2. [Table 6](#) lists the software required if you are upgrading from Recruiter 3.7.1 or higher.

Table 5: Required software for new installations

Browser Compatibility

Recruiter 3.8.2 allows you the option to use different browsers to access Recruiter (CRM Web application) and your Recruiter external website.

Note: Browser compatibility is the same for Recruiter 3.8.2 as it was for Recruiter 3.8.1.

Table 11 provides information about the supported browsers for Recruiter (CRM Web Application). CRM Update 18 is supported for all supported operating system and browser combinations. CRM Update 19 is not yet supported.

What's New in Recruiter

In This Chapter

This chapter contains information about the changes and enhancements included in the Recruiter 3.8.2 release.

[Table 13](#) lists the topics covered in this chapter.

Table 13: Topics in this Chapter

Topic	Page
Subtest Configuration Settings	20
Correct SAT Subject Tests	21
Correct ACT Subtests	24
Update Import Mappings	28
Updated SAT Macro	28
Updated Apply Texas Parser	28
New Workflow	29
Resolutions	29

Subtest Configuration Settings

Note: If you previously configured these settings, you should review the settings for SAT subject tests as an issue in Recruiter 3.8 prevented them from being created.

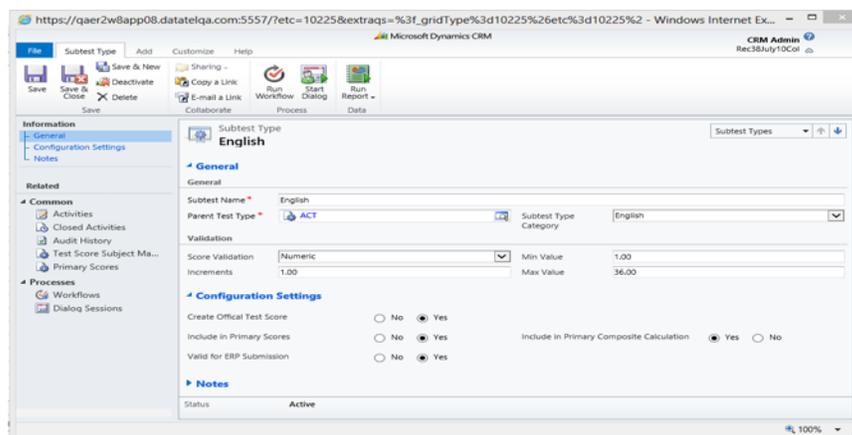

The 2015 SAT and 2015 ACT have many new subtest scores. These scores may or may not be important to your institution's business process. To allow you to tailor the handling of these scores to your needs, Recruiter has the following configuration settings:

- Adding the subtest scores to the official test score record
- Including in the primary test score
- Sending to your ERP

Official test scores need to be created to include them in the primary test scores or send them to an ERP.

You can configure each type of subtest for each of these three options in the new Subtest Type list in Validation List Management (available under Settings). Changes made are applicable globally (that is, they apply to all subtests for that type that are imported into your organization).

The image below is an example of the Subtest Type options available.

Correct SAT Subject Tests

The SAT subject tests were imported into the test staging records, but were not promoted to official test score records if the system was configured to create official test scores for these subtests.

To correct the SAT subject test records, perform the following steps.

Step 1. In Recruiter, click **Advanced Find**.

Step 2. In the **Look for** drop-down list, select **Test Score Staging Records**.

Step 3. Add a search criterion by performing the following:

- a. In the first drop-down list, select **Created On**.
- b. In the second drop-down list, select **On or After**.
- c. In the third drop-down list, enter **9/15/2015**.

Note: Only SAT subject test records created after the new SAT layout went into effect are affected by this issue. The new SAT layout went into effect on 9/15/2015.

Step 4. Add another search criterion by performing the following:

- a. In the first drop-down list, select **SAT Subject Test 1 Test Date**.
- b. In the second drop-down list, select **Contains Data**.

Step 5. Repeat [Step 4](#) on [page 21](#) for each of the following fields:

- SAT Subject Test 1 Score
- SAT Subject Test 1 Subject
- SAT Subject Test 2 Test Date
- SAT Subject Test 2 Score
- SAT Subject Test 2 Subject
- SAT Subject Test 3 Test Date
- SAT Subject Test 3 Score
- SAT Subject Test 3 Subject
- Prev Sat Subject 2 Set 1 Date 1
- Prev Sat Subject 2 Set 1 Score 1
- Prev Sat Subject 2 Set 1 Subject 1

Step 6. Select each of the criteria you created in [Step 4](#) on [page 21](#) and [Step 5](#), and then click **Group OR**.

Step 7. Click **Results**.

If no records are returned, you can skip to the next section. Otherwise, continue to the next step.

If more than 250 records are returned, save the Advanced Find as a view, and then continue to [“Use Workflow Scheduler to Promote Records”](#) beginning on [page 23](#). If less than 250 records are returned, continue to the next step.

Step 8. From the list of results, select all of the records, and then click **Run Workflow**.

Step 9. In the **Look Up Record** dialog box, select **Create Test Score From Staging Record**, and then click **OK**.

Step 10. On the **Confirm Application of Workflow** dialog box, click **OK**.

Use Workflow Scheduler to Promote Records

The Advanced Find only allows you to select up to 250 records at a time. If you have a large number of records to promote, you can use the workflow scheduler to run the workflow against a large set of records.

Step 1. In the Navigation Pane, click **Settings**.

Step 2. In the **General Settings** section, click **Workflow Scheduler**.

Step 3. Click **Add new schedule**.

Step 4. In the **Workflow Info** section, enter the following information:

- **Name.** Enter a name for the workflow schedule.
- **Workflow.** Select **Create Test Score From Staging Record**.
- **Status.** Select **Active**.

Step 5. In the **Criteria View** field of the **Workflow Criteria** section, select the view you created in [Step 7](#) on [page 22](#).

Step 6. In the **Workflow Schedule** section, enter the following information:

- **Start Date.** Enter a date to run the workflow.
- **End Date.** Enter the same date that you entered in the Start Date field.
- **Occurs Every.** Enter **1**, and then select **Day(s)**.

Step 7. Click **Save**.

Correct ACT Subtests

The ACT 2015 English subtest was improperly creating an English Language Arts subtest record instead of an English subtest record. In addition, the ACT 2015 English Language Arts subtest was improperly creating an English subtest record instead of an English Language Arts subtest.

Note: If you have already fixed this issue using the workaround in Change Requests 000133019 and 000135335, you do not need to perform the steps in this section.

To correct the ACT subtest records, perform the following steps.

Step 1. In Recruiter, click **Advanced Find**.

Step 2. In the **Look for** drop-down list, select **Test Scores**.

Step 3. Add a search criterion by performing the following:

- a. In the first drop-down list, select **Test Type**.
- b. In the second drop-down list, select **Equals**.
- c. In the third drop-down list, enter **ACT**.

Step 4. Add a second search criterion by performing the following:

- a. In the first drop-down list, select **Created On**.
- b. In the second drop-down list, select **On or After**.
- c. In the third drop-down list, enter **8/13/2015**.

Note: Only ACT Subtest records created after the release of Recruiter 3.8 are affected by this issue. Recruiter 3.8 was released on 8/13/2015.

Step 5. Click **Results**.

If no records are returned, you can skip to the next section. Otherwise, continue to the next step.

If more than 250 records are returned, save the Advanced Find as a view, and then continue to [“Bulk Delete ACT Subtests” beginning on page 26](#). If less than 250 records are returned, continue to the next step.

Step 6. From the list of results, select all of the records, and then click **Delete Test Score**.

Step 7. On the **Confirm Deletion** dialog box, click **OK**.

Step 8. After the records have been deleted, click **Advanced Find**.

Step 9. In the **Look for** drop-down list, select **Test Score Staging Records**.

Step 10. Add a search criterion by performing the following:

- a. In the first drop-down list, select **Test Score Contract**.
- b. In the second drop-down list, select **Equals**.
- c. In the third drop-down list, enter **ACT Test Scores 2015**.

Step 11. Add a second search criterion by performing the following:

- a. In the first drop-down list, select **Created On**.
- b. In the second drop-down list, select **On or After**.
- c. In the third drop-down list, enter **8/13/2015**.

Note: The date you enter should match the date you entered in [Step 4](#) on [page 24](#).

Step 12. Click **Results**.

If more than 250 records are returned, save the Advanced Find as a view, and then continue to [“Use Workflow Scheduler to Promote Records” beginning on page 27](#). If less than 250 records are returned, continue to the next step.

- Step 13.** From the list of results, select all of the records, and then click **Run Workflow**.
- Step 14.** In the **Look Up Record** dialog box, select **Create Test Score From Staging Record**, and then click **OK**.
- Step 15.** On the **Confirm Application of Workflow** dialog box, click **OK**.

Bulk Delete ACT Subtests

The Advanced Find only allows you to select up to 250 records at a time. If you have a large number of records to delete, you can use the bulk delete function.

- Step 1.** In the Navigation Pane, click **Settings**.
- Step 2.** In the **General Settings** section, click **Data Management**.
- Step 3.** Click **New**.
- Step 4.** On the welcome screen, click **Next**.
- Step 5.** In the **Look for** drop-down list, select **Test Scores**.
- Step 6.** In the **Use Saved Field** drop-down list, select the view you created in [Step 5](#) on [page 24](#).
- Step 7.** Click **Next**.
- Step 8.** In the **Name** field, enter a name for the bulk deletion job.
- Step 9.** In the **Bulk deletion job start time** field, enter a date and time to perform the bulk delete, and then click **Next**.

Step 10. Review the details of the bulk deletion job, and then click **Submit**.

Step 11. After the bulk deletion job has completed, continue to [Step 8](#) on [page 25](#).

Use Workflow Scheduler to Promote Records

The Advanced Find only allows you to select up to 250 records at a time. If you have a large number of records to promote, you can use the workflow scheduler to run the workflow against a large set of records.

Step 1. In the Navigation Pane, click **Settings**.

Step 2. In the **General Settings** section, click **Workflow Scheduler**.

Step 3. Click **Add new schedule**.

Step 4. In the **Workflow Info** section, enter the following information:

- **Name.** Enter a name for the workflow schedule.
- **Workflow.** Select **Create Test Score From Staging Record**.
- **Status.** Select **Active**.

Step 5. In the **Criteria View** field of the **Workflow Criteria** section, select the view you created in [Step 12](#) on [page 25](#).

Step 6. In the **Workflow Schedule** section, enter the following information:

- **Start Date.** Enter a date to run the workflow.
- **End Date.** Enter the same date that you entered in the Start Date field.
- **Occurs Every.** Enter **1**, and then select **Day(s)**.

Step 7. Click **Save**.

Update Import Mappings

Recruiter 3.8.2 includes updated mappings and CIP codes for the following imports:

- SAT 2015
 - CIP codes
 - Denomination mappings
- College Board SSS Suspect Import 2015-2016
 - CIP codes
 - Academic Interest mappings

You should review and update your mappings for these imports to take advantage of the new and updated values. See the “Defining Import Contract Mappings for Delivered Recruiter Imports” section in the *Recruiter 3.8 Configuration* manual for more information.

Updated SAT Macro

Ellucian recommends using csv format for SAT test score imports so that you do not need to use a macro to format the file. If you do not have SAT test scores in csv format, an updated version of the macro used for SAT 2015 imports has been delivered with Recruiter 3.8.2 to fix issues with the macro. See the Recruiter 3.8.2 release summary for details on the issues fixed in the SAT macro.

Updated Apply Texas Parser

An updated version of the Apply Texas parser has been delivered with Recruiter 3.8.2 to fix an issue with certain international addresses that generated an `Index and length must refer to a location within the string`. Parameter name: `Lengtherror`.

New Workflow

The Update SAT 2015 Testscore Import Ethnicity Data workflow has been delivered with Recruiter 3.8.2. This workflow will be used in conjunction with a utility that will be released after Recruiter 3.8.2 to correct ethnicity data. This workflow should not be used now.

Resolutions

The [Recruiter 3.8.2 release summary](#) is a companion to this manual. The release summary provides details about the release and change requests that are resolved in Recruiter 3.8.2.

For additional details about any of the change requests resolved in Recruiter, go to <http://www.ellucian.com/Solutions/Ellucian-Client-Support/>, use the Ellucian Hub to access the Ellucian Support Center, and use the Search field or Change Requests area to locate a change request.
